

Biodegradable Composites for Bone Regeneration

Filesize: 4.06 MB

Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Pearl Corwin)

BIODEGRADABLE COMPOSITES FOR BONE REGENERATION

Nova Science Publishers Inc. Paperback. Book Condition: new. BRAND NEW, Biodegradable Composites for Bone Regeneration, Luigi Calandrelli, Paola Laurienzo, Mario Malinconico, In the present book, after briefly summarising recent literature concerning modification and applications of these materials, several recent developments of bio-composites containing silica nanoparticles or calcium sulphate intended for bone regeneration are reported. The composites are characterised with respect to their chemical-physical and mechanical properties. Their bio-compatibility and capacity to induce the osteoblastic phenotype in human bone marrow mesenchymal stem cells have been assessed. The authors focus on two particular systems based on either natural or synthetic bio-polymers with different biofillers: alginate/chitosan blends with calcium sulphate and poly(-caprolactone) with silica nanoparticles.
