The student who wishes to learn how, when, and where the facts and objects which interest him were discovered, has himself to excavate the desired information from the innumerable volumes of reports issued by the various exploration societies. It is much to be desired that someone who is master of the subject, and preferably, someone who has had actual experience of the work of excavation, should tell the story, not in a manner suited only to the ears of experts, but so that the educated public on whom in the long run excavation must depend for its resources, could appreciate and enjoy a narrative which ought to be as fascinating as any story of search for buried treasure. This volume makes no pretension to the discharge of such a task. All that it attempts to do is to outline the story of certain aspects of the great work which has given us back so many of the wonders of the ancient civilisation of Egypt. Its omissions are, doubtless, many; but two will be at once conspicuous to anyone who has the slightest acquaintance with the subject.
