Reviews

This publication is very gripping and intriguing. It is among the most awesome book we have go through. You can expect to like how the author compose this book.

(Dr. Malika Bechtelar II)

HAND AND POWER TOOLS

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 8.0in. x 5.0in. x 0.1in. OSHA Publication 3080, Hand and Power Tools, is designed to present to employees and employers a summary of the basic safety procedures and safeguards associated with hand and portable power tools. Material in this booklet is based on the standards of the Occupational Safety and Health Administrations; this booklet, however, should not be considered as a substitute for the full safety and health standards for general industry (published in Title 29 Code of Federal Regulations (CFR, Part 1910, Subpart P), or for the construction industry (published in 29 CFR Part 1926, Subpart I). These are also available on the web. Employers and employees in the 26 states and territories with OSHA-approved state safety and health plans should check with their state agency. Their state may be enforcing standards and other procedures that, while at least effective as: federal standards, are not always identical to the federal requirements. Tools are such a common part of our lives that it is difficult to remember that they may pose hazards. Tragically, a serious incident can occur before steps are taken to identify and avoid or eliminate tool-related hazards. Employees who use hand and power tools and are exposed to the hazards of falling, flying, abrasive, and splashing objects, or to harmful dusts, fumes, mists, vapors, or gases must be provided with the appropriate personal protective equipment. All electrical connections for these tools must be suitable for the type of tool and the working conditions (we, dusty, flammable vapors). When a temporary power source is used for construction a ground-fault circuit interrupter should be used. Employees should be trained in the proper use of all tools. Workers should be able to recognize...
