

Physical Review Volume 24 (Paperback)

Filesize: 2.77 MB

Reviews

These kinds of pdf is almost everything and got me to hunting forward and much more. It is among the most amazing publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Samanta Satterfield)

PHYSICAL REVIEW VOLUME 24 (PAPERBACK)

To get **Physical Review Volume 24 (Paperback)** eBook, please refer to the link listed below and download the file or get access to additional information which are related to PHYSICAL REVIEW VOLUME 24 (PAPERBACK) ebook.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 edition. Excerpt: .pieces, as shown in the figure, and the two parts are held together by a strong rubber band (not shown) and kept from sliding sidewise by the pins 55. The face of the smaller section was filed, so as to always make a contact at the end of the block. This makes a satisfactory slide, free from contacts having strong thermo-electric power. It is necessary, however, to polish the wires with fine emery cloth before using. This is especially true of the copper wire; a small quantity of oxide making the resistance of the contact variable so that no satisfactory adjustment is possible. After a balance of the bridge was obtained the thermo-electric current in the galvanometer circuit was compensated and then again the final balance of the bridge made. The quantity of induced electricity passing through the galvanometer at the opening of the main circuit was compared with the quantity discharged from a standard condenser. The resistance of the galvanometer circuit was measured after each set of observations. The coefficients for two coils wound on the same spool were determined; and to test the accuracy of the values obtained, the coefficients of the two placed in series with the currents first in the same and then in opposite directions were determined as was also the coefficient of mutual induction. The following observations were common to all the self-induction determinations: $t = 20.2$ to 20.3 C. $R_i = R_4 = 99.99$ ohms. $A = 9.9966...$
