Brand New Book ***** Print on Demand *****.Excerpt from Post-Graduate Course of Lectures: Medical Faculty University of Toronto For several years it has been my custom in my lectures at the University of Pennsylvania to pass rapidly over the evidence in support of the antiseptic theory of wound treatment with the remark that the time for argument had passed, and it was merely necessary now to present such facts as might serve to make clear such principles involved and to emphasize the enormous benefit that has resulted from the application of those principles to practical surgery. It seemed to me that the theory of antiseptics rested upon a mass of correlated facts, experimental, clinical, and bacteriological, sufficient to establish it on a firm foundation, and that the only debatable ground remaining was that relating to the selection of methods and the improvement of details. I considered that the problem had been so scientifically stated, and its solution had been so thoroughly accomplished that, as regarded the general principles, no opposing views worthy of mention remained for discussion or refutation. I also thought that the...
