Then we conceive the distance AP as increasing continuously from zero to 3 units: that is to say, the distance AP passes through all possible magnitudes between zero and AB; and yet if we use only the arithmetical concept of number we have no means of expressing the distance AP accurately in terms of the unit of length whenever P is in such a position that AP is incommensurable to the unit of length. Accordingly we require somehow to extend our conception of number in such a way that number (like magnitude)...
